Elluminate Live![®] Version 7.0

Participant Quick Reference Guide

Elluminate *Live!* is a world-class, real-time training, demonstration and collaboration environment that is powerful, flexible and easy to use. Interacting online is all about the experience. That's why we've designed the Elluminate *Live!* family of products to give you what is quite simply the BEST user experience in the industry for real-time, remote teaching, training, meeting, and much more. Effectiveness is increased by engaging participants with the ability to talk over the Internet (with full duplex audio), chat online, share video, whiteboards, multimedia files and applications—all in one intuitive, graphical interface.

Unlike the Internet, Elluminate *Live!* is built specifically for live, multi-media collaboration. Our unique Collaborative Communications Framework (CCF) automatically ensures that everything is in the right place at the right time. Whether you have a dial-up modem or a high-speed LAN, you get the same superior quality, high performance, and dependability—with no lag time or garbled communication. So you can focus on content, not technology.
